---

PROFILE

Results-driven software engineer with foundations in electrical engineering and a track record of building production-ready applications, SaaS platforms, and modern web architectures. Proficient across the entire software development lifecycle from UI/UX implementation to backend engineering and database design. Adept at leveraging modern technology stacks to deliver scalable, user-centric software solutions.

EDUCATION

Bachelor of Engineering (B. Eng)

Joseph Sarwuan Tarka University, Nigeria.

Graduated: october, 2025

WORK EXPERIENCE

IT Officer | Mseve Initiative **September, 2024 – Present**

- Led client engagements and provided technical and strategic advisory support for organizational initiatives[cite: 1].
- Developed and optimized operational workflows and technical processes to enhance efficiency and program delivery.
- Managed technical infrastructure requirements and cross-functional coordination for organizational projects.

CTO | kuratorPro **Feburary, 2025 – Present**

- Architected and built an AI-powered career document platform (resumes, cover letters, portfolios) end-to-end, including an entity-to-template mapping engine, a MongoDB-backed template system with tiered visibility rules (regular / premium / exclusive).
- Built a Playwright + Thymeleaf PDF generation pipeline producing clean, multi-page, ATS-friendly documents across different templates.
- Implemented a real-time notification system using Server-Sent Events.
- Planned and configured production deployment on a constrained single-VPS environment using Coolify, Docker, and GraalVM native image compilation via CI.

CERTIFICATIONS

- Python Advanced & Beginners: Certified by National Center for Artificial Intelligence & Robotics (NCAIR) / NITDA (November 2024 & September 2024).

- Java : self taught java programmer.

PROJECTS

MemeDash (Thymeleaf, Vue.js):

- Meme community platform including admin dashboard, uploads, authentication, and a payment flow for paid content.

kuratorPro (Spring Boot, Vue.js, MongoDB):

- AI powerd career document generated, designed fo job seekers to help streamline the job application process.

Personal Portfolio.

- Built a hash-routed Vue 3 SPA developer portfolio, designed a reusable Page → View → Sub View Vue routing pattern used for page navigation.

SKILLS

- **Languages & Frameworks:** Java, Spring Boot, Python, Vue.js, JavaScript, HTML, CSS, Tailwind CSS, Thymeleaf
- **Data & Infrastructure:** MongoDB, PostgreSQL, MySQL, REST APIs, Docker, Coolify, GraalVM, Redis, Git
- **Other:** AI/LLM orchestration, payment integration, REST APIs.
